TO THE CLASS:

This book marks the seventh year since graduation. Although we had a successful Triennial in New Haven in 1940, the war made it necessary for us to cancel our Sexennial originally scheduled for June of 1943.

The purpose of this publication is to bring the Class history up-to-date and to replace as far as possible the Sixth Reunion, which could not be held. As members of Yale College and the Sheffield Scientific and Engineering Schools would all have attended such a reunion together, it was accordingly decided to make this book a joint record.

We started compiling the information for this edition some months ago. It took a long time to collect the answers to our original questionnaires, and by the time we were ready to go to press, it was considered advisable to send out a follow-up card to make sure that any late information was included. Many men or their families answered all our questions, while some replied to none. In the latter cases information was taken whenever possible from records available at the Class Secretaries Bureau.

Your secretaries sincerely hope that this book will serve to preserve and strengthen the feeling of Class unity which existed at graduation. The up-to-date addresses as covered herein will help you to keep in touch with one another until the Tenth Reunion in 1947.

We wish to take this opportunity to express our appreciation to Miss Marion L. Phillips of the Class Secretaries Bureau for her invaluable assistance in the preparation of this history and to all members of the Class and their families who furnished biographical information.

In March, 1943, Geof wrote as follows: "I am working as an executive assistant in the probate division of the trust department of the Second National Bank of Boston, carrying out the administrative provisions of living trusts, investment agency accounts, trusts under wills and estates. Most of my work, however, is centered on the administration of estates, especially state and Federal inheritance taxation. Working under and with bankers and lawyers, I have come to sense the tenuous but well-defined boundaries of their several domains—a division of authority and duties which seems well established and equally as well adhered to by members of each profession (though banking is definitely not a profession, but a business, which any lawyer will tell you). By necessity and inclination have been both attracted by and lured into State and Federal income tax work and have gradually overcome my innate annoyance with the complexities of the latter, which I begin to find interesting (from an objective standpoint, of course). I attended the Yale Graduate School, taking a course in general studies—mostly linguistics and secondary school education—during 1939-40. I attended the Harvard Law School during 1940-41. I have been working at the Second National Bank of Boston since 1941. Was assistant secretary and assistant treasurer, 1941-42, and secretary and treasurer, 1942-43, of the Yale Club of Boston. Lived with Bill Bundy, '38, and Lloyd W. Bowers, '39, while at the Harvard Law School, out in Marblehead the summer of 1941, and since then

on a quiet 'lost street' on Beacon Hill, the location of which is unknown to even the oldest Bostonians. Having had a fling at prep school teaching, graduate school, and law school, I think I've at last found interesting and useful work to do, though Boston is plenty dull in spots."

Supplementing the above in a note written January 20, 1944, Geof said, "Have moved from sooty Boston (where I still work, of course) to a wonderful house 'way out in the country, eschewing urban pleasures for good old country air, woodchopping, and the usual Victory garden."

Hoyt Advertising Company in New York. In May, 1941, I resigned my job as director of research in that company to prepare for entrance into the Harvard Graduate School; field—philosophy. In a note which came in March, 1943, when he was on the staff of the Commander-in-Chief of the United States Fleet, he said, "I came to this job after almost nine months at sea on the U.S.S. —, where I was the sole Eli in a hotbed of Harvardism. Managed to hold my own O.K. My tour here started in February of 1942 and will be terminated soon, I hope. The pleasure of getting out will allay the ignominy of being relieved by a lady Ensign. Prior to being caught in April, 1942, I had been practicing at Larkin, Rathbone & Perry in New York City. I had graduated from Columbia Law in 1940 and was admitted to the bar in the fall. That summer was spent touring South America in a strictly non-luxury manner, which was most entertaining and interesting. I got to every country except Paraguay and Bolivia. During my tour of sea duty I saw quite a few classmates and seemed to run into Yale people everywhere. The more Godforsaken the places were, the more Yale men there seemed to be there. I am hoping to get to Subchasers for my next duty." Mitt entered active duty as an Ensign in April, 1941. He was promoted to Lieutenant (j.g.) in January, 1942, and to Lieutenant the following June.

Went to school most of the time at this place and the latter part of May was sent to a Coast Artillery school in Virginia as a Pfc. 'Washed out' of flying school the middle of November and went to Alabama destined for navigation school, and the latter part of January, 1942, left for California and graduated from school with a commission and wings, May 23, 1942. Saw a good bit of the country until we flew to England in the middle of the summer. Last December was promoted to a First Lieutenant. My services seemed to be needed badly and immediately in Arkansas at Camp Robinson, whence I was rushed by private train—on which several hundred rookies seemed also to be riding—just in time to get numerous shots, not all of them in the arm. In his report covering the past three years, Al said: "Contributing editor of *Time Magazine* until January, 1941, when I made my big mistake. Went to Jacksonville, where I took flight training, and was sent to San Diego in December, 1941, for advanced carrier training. Joined a Scouting Squadron in April, 1942, and was soon aboard one of the big carriers headed west. We saw our first action on August 7, giving air coverage to the Marine landing on Guadalcanal. Later that month saw more action in a carrier engagement in which our air group attacked and reportedly mortally wounded the Jap carrier *Ryuzo*. We flew ashore to one of our island bases around the end of August and then had a rather unpleasant five weeks of flying off Henderson Field on Guadalcanal. If we'd known what was coming, I don't think we'd have done our bombing quite so enthusiastically on August 7. They sent us home in November and now we're getting ready for an encore.

"Pete Peterkin was attached to another squadron in our Air Group and was on all those little journeys. So was Ben Grosscup, '35. Don McNeely was on our carrier, and Whitey Carhart was on the *Hornet*, which was in our Task Force for a while. Came back to the States on the same transport with Carhart, who was burned when a Jap plane crashed into his ship. He took me for \$1.37 on gin rummy—a game McNeely taught me,

damn it. John Hersey, '36, lived in a tent with a couple of us on Guadalcanal, and I recommend all his writings on the subject of the definitive works—especially his book, *Into the Valley*, which for my dough rates with the best war stories of all time. And I don't own any Knopf stock."

In the fall of 1943 Al was awarded the Distinguished Flying Cross, the citation reading as follows: "For heroism and extraordinary achievement as Pilot attached to Scouting Squadron 3 during action against enemy Japanese forces in the Solomon Islands Area, September 24 to October 14, 1942. Although attacked by two hostile float aircraft while engaging a destroyer off Choiseul Island, Ensign Wright, as wing man in a two-plane aerial search, courageously fought his Scout Bomber through heavy anti-aircraft fire to destructively bomb and strafe the enemy warship, damaging it seriously by a near miss. In addition to conducting numerous other searches over hazardous territory, Ensign Wright participated in aggressive attacks on a total of twenty-five vessels. By his outstanding airmanship and loyal devotion to duty, he contributed immeasurably to the damage which was inflicted on valuable hostile shipping."

When Al went on active duty he ranked as a Seaman (2d class). He received his appointment as Aviation Cadet in May, 1941, and the following December was appointed Ensign and received a Naval Aviator's rating. He is now a Lieutenant. He has just returned from another tour of active duty.

In a recent note he said, "As to my activity—I am what is called an Administrative Officer—have been for about fourteen months. This means that I keep house for a 'big boat' squadron. Currently I am in the U.S.A. after about eight months in the Panama Sea Frontier. In a month or so I shall be off again with a brand new outfit." Jack now ranks as a Lieutenant.

When he reported in April, 1943, he said that he was Engineering Officer of a new Dive-Bombing Squadron and added, "All my activities have been strictly Navy and, luckily, in aviation. For two years I weathered the monotony of instructing cadets at Pensacola, Jacksonville, and Washington, D.C. Finally, the 'ants in my pants' bit a little too constantly, and at last I got fleet duty. Three members of our squadron have

Navy Crosses for Midway and the South Pacific battles. Just give us a little time and you'll be hearing from us."
